HISTORY OF HOO ZOO AND DINOSAUR WORLD, SHROPSHIRE'S FIRST ZOO

The farm itself is possibly 200 years old and over the years has been a dairy farm, Christmas tree nursery and award winning farm attraction, but most of all it has been a happy home to the Dorrell family since 1988.

Edward and Carolyn Dorrell – dairy farmers from Telford and one of the pioneers of dairy ice cream, moved to Hoo Farm in 1988, where the land had been used for growing Christmas trees. It was with these Christmas trees that Hoo Farm first opened its gates to the public; the first place to offer 'Cut and Dig Your Own Trees' in the West Midlands.

It wasn't long until customers started asking to look at the animals that took residence and so in the Spring of 1991, the gates were officially opened as Hoo Farm Animal Kingdom. Over the years more animals from around the world have taken residence. Ostrich, llama and deer arrived. Foxes, owls, raccoons and various reptiles all became popular with visitors and these days meerkats and alpacas are still big attractions.

In 2004 Hoo Farm was awarded a zoo license; becoming Shropshire's first and, at the time, only zoo.

WHAT WE OFFER

A visit to Hoo Zoo is the perfect opportunity for children to learn outside the classroom. The primary aim of your visit is for us to support the school's efforts in meeting the requirements of the national curriculum for key stages 1 & 2.

The national curriculum sets out the programmes of study and attainment targets for all subjects and we will work with you to develop work, assignments and activities for compulsory subjects which may include reading and writing, mathematics and geography.

Some of these can be done prior to the visit, on the day of the trip and following when they have a better understanding of the animals.

National Curriculum and Hoo Zoo

A visit to Hoo Zoo can be beneficial for many reasons during EYFS, Key Stage 1 & Key Stage 2 . Below are some examples of what topics a visit can cover – this list isn't exhaustive and we're always happy to discuss other visit ideas.

EYFS: Help develop motor skills on our play area, Sing and sign through our specialist signage and understanding of the world.

Year One: Animals, Including Humans.

Help children identify fish, amphibians, reptiles, birds and mammals through visiting the animals along with our 'Meet the Owl', 'Meet the Hedgehog/Meerkat' and 'Meet the Snake' talks.

Help children identify and name Carnivores, Herbivores and Omnivores through the above talks as well as visiting our Dinosaur World.

Help children describe and compare the structure of a variety of common animals through observing our Parrots, Big Cats, Wolves and Snakes.

Help children identify, name and label the basic parts of the human body and say which part is associated with each sense through our tailored talks.

National Curriculum and Hoo Zoo

Year Two: Living Things and Their Habitats & Animals, including Humans.

Explore and compare the differences between things that are living, dead, and things that have never been alive by visiting our (New for 2021) by visiting our Dinosaur World. Learning about animals that are alive now and those that have gone extinct.

Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other by observing how each animal enclosure is different along with our tailored 'Meet the Animal' talks discussing what each animal eats.

Identify and name a variety of plants and animals in their habitats, including microhabitats by observing animals in their habitats and filling out a school activity sheet (please see download links later in the pack).

Help children describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food through visiting the animals, dinosaurs, listening to one of our tailored talks and filling out a relevant activity sheet.

National Curriculum and Hoo Zoo

Year Three: Animals, including Humans.

Help children identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat by showing them different animals along with the food that they eat at various talks.

Help children identify that humans and some other animals have skeletons and muscles for support, protection and movement by allowing them to get hands on with different species. By visiting our Education Centre the children can see different animal skeletons and how mammals, birds and reptiles all differ.

Year Four: Living things and their habitats. Animals, including Humans.

Help children recognise that living things can be grouped in a variety of ways, explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment through our tailored 'Meet the Owl, Meerkat and Snake' talks along with filling out school activity sheets (please see download links later in the pack).

Help children recognise that environments can change and that this can sometimes pose dangers to living things by visiting our (New for 2021) Dinosaur World and learning about what changes made the dinosaurs go extinct.

Help children construct and interpret a variety of food chains, identifying producers, predators and prey by visiting different animals around the farm (both predators and prey) along with one of our tailored talks.

National Curriculum and Hoo Zoo

Years Five and Six: Living things and their habitats.

Help children describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird through our tailored 'Meet the.....' talks looking at the differences between Owls, Snakes and Skunks.

Help children describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences by looking at different species of animals around the zoo and filling in a relevant activity sheet.

Help children give reasons for classifying plants and animals based on specific characteristics by listening to one of our tailored talks looking at the differences between different taxonomic families.

ORGANISING YOUR SCHOOL VISIT

After choosing the date you wish to visit Hoo Zoo and Dinosaur World, please fill in our booking form at <https://www.hoo-zoo.com/visit/schools/>

We will invoice at the time of booking and request payment no later than 14 days before your visit. Payment can be made by cheque or BACS.

GROUP SIZES AND COSTS

Rates: £10 per child. 1 adult to every 6 children free.

Group prices are the same regardless of size.

Booked visits are non refundable and non transferable.

Further information regarding parking and full instructions for the day will be sent via email.

These websites offer lots of helpful advice and resources when planning, preparing and undertaking your visit:

HOO ZOO APP

As part of our responsibility to become carbon neutral we are now paperless. Your staff will need to download the Hoo Zoo App before attending either (just search Hoo Zoo in either the App or Google Play Store). There you will find an interactive map and list of daily activities. This is also an incredibly important education resource with links to important information and even educational videos on most of our animal.

*Download our FREE app...

DINOSAUR TOUR

Touted as one of the best dinosaur parks in the country, Hoo Zoo and Dinosaur World is home to over 30 life size realistic animatronic dinosaurs. Set throughout a woodland walk, we have gone to great lengths to ensure the experience is educational along with being fun. Taking children (and adults) through time from the Permian all the way to the Cretaceous periods in period correct settings we genuinely feel you won't get a more authentic experience anywhere else.

Exclusively for groups we offer Dinosaur Tours. These are roughly 30 minute long tours with our Dino Ranger who will tell the children all about the Dinosaurs in each area whilst also bringing along fossils (both replica and genuine) for the kids to get up close to and touch.

£1 per child. With Fossil Workshop £4 per child.

FOSSILS WORKSHOP

This 30 minute long workshop includes:

1. Introductory talk about fossils, dinosaurs and prehistoric creatures. During this talk we will cover the fossilisation process and the difference between body and trace fossils whilst also showing some of our own fossils.
2. Tactile session where children can physically hold some of our fossils and touch others whilst being told about them and invited to ask questions.
3. Sorting session where children are encouraged to sort each fossil into trays indicating whether they are 'trace' or 'body' fossils.
4. Short show and tell of specific geodes and minerals with an explanation of how they form.
5. A short quiz on what the children have learned during the session.

Finally, all children get to take their very own REAL fossil home with them!

£3.50 per child. With Dinosaur Tour £4.00 per child.

CLIMBING WALL

Looking for something different on your visit? How about a climbing wall experience?

Suitable for children 5+ climbing walls are a great way to build confidence, build communication and develop motor skill (not to mention just being all round good fun).

£3.00 per child.

Please be aware this cannot run in windy or very wet weather.

ZOO KEEPER

HEALTH & SAFETY

During your visit to Hoo Zoo the health and safety of the children and those accompanying them is a priority and we will provide you with the relevant documentation before your visit to ensure everyone remains safe whilst with us.

A school representative will be invited to Hoo Zoo in advance of the scheduled visit to meet with our school co-ordinator and to conduct any required risk assessments.

To assist in maintaining a safe and comfortable environment for all our visitors we ask that all pupils are effectively supervised and for this purpose we admit a ratio (1:6) of supervising adults free of charge.

Teachers are responsible for the children in their group at ALL times. Our team will be on hand to lead the activities and answer any questions.

POINTS TO REMEMBER

- Encourage children to wash hands thoroughly with soap and water after touching the animals, especially before eating. Please do not rely on hand sanitizer
- Children should be supervised at all times when using the play areas and the 'Rules of Play' must be adhered to
- Take note of any safety signs
- The Fire Assembly Point is our disabled car park
- The 'Lost Children Point' is **The Gift Shop Till**
- No eating or drinking in animal contact areas
- The First Aid point is located in the **Gift Shop**
- Follow the instructions given by your host at the activities.

FAQs.

Is the visit guided?

No, all school visits are unguided. However, keepers will be running various educational talks and activities that the children are welcome to take part in. We will endeavour to hit the various education points requested at these talks.

Will we be the only group?

We allow a maximum of 150 children each day with school/group visits but usually keep it around 100. Our keepers are all well used to giving talks to large crowds and will instruct the children (and adults) at the talks efficiently.

Do you have a Risk Assessment?

Indeed we do and this is included with your confirmation as standard. However, it is vital that you perform a preliminary visit before visiting.

Can we conduct a preliminary visit?

Absolutely yes! This is a vital part of the booking. We provide 2 free adult tickets once you have booked so that you can conduct a preliminary visit. To get these you just have to drop us an email and we will book you in for the day of your choice to come along and have a look around. We cannot stress enough how important this is. Not just can you conduct your own risk assessment, it will give you the opportunity to work out where the activities all take place, find the best spots for lunch and ask us any questions that you may have about your visit.
